Write a socket program where the server sends a word/number to the client and the client checks whether it is a palindrome or not. Draw appropriate flowcharts along with pseudocodes

Write a socket program where the server sends a message to the client and the client calculates the number of characters and numbers in the message. Draw appropriate flowcharts along with pseudocodes.

VIVA:

- What is a socket?
- What is a port?
- Where are ports situated physically on a computer? (NIC)
- Phone call (connection oriented or connection less?)
- Post service (connection oriented or connection less?)
- TCP and UDP
