B.Tech. (Computer Engg.) V Semester Examinations

Session 2022-23

Time: 1 hr. **Computer Networks (CEN - 505) Sessional-III** Max. Marks. 15

Note: Attempt All Questions

1. CO4	Define CSMA/CD and CSMA/CA. Discuss how hidden terminal problem and exposed terminal problem are solved using CSMA/CA.	5
2. CO4	Discuss vulnerable time of pure aloha and slotted aloha. A group of N stations share a 50-kbps slotted aloha channel. Each station outputs 500 bits from on an average of once every 5000 msec, even if previous one has not been sent. What is the maximum value of N?	5
3. CO5	For the given figure, make a routing table of router 'u' using link state routing algorithm. Show all steps evolved.	5
