B.Tech. Computer Engineering. V Semester I Sessional Test – 2023

Paper Code: CEN-505	COMPUTER NETWORKS	Max Time: 1 hrs.
	Note: Attempt All Questions	Max. Marks: 15

Q1 CO1	What are the different classes of IPV4 addresses? Write range of addresses for each class in dotted decimal notation	5
Q2 CO2	Draw the graph of the Manchester, differential Manchester and 2B1Q scheme using the following data streams: 0 1 1 0 1 1 0 1 0 0	5
Q3 CO2	Here is a network having bandwidth of 1MBps. A message of size 1000 bytes has to be sent. The packet switching technique is used. Each packet contains a header of 100 bytes. On the following, in how many packets the message must be divided so that total time taken is minimum? (propagation delay is ignored here).  i. 1 Packet ii. 5 Packets iii. 10 Packets iv. 20 Packets Calculate Total time taken for each case.	5
