First Minor Examination 2021

B.Tech. Computer Engineering V semester

Microprocessor CEN-503

Marks:-*15* Time:-One Hour

Attempt all questions honestly. Marks are written in the margin. You should not share your answers with anyone by any means. If it is found that sharing and copying have been done, then all involved in this will be awarded zero marks. Attempt these questions on your own papers and write your Roll No. and name on all pages. Upload PDF of your scanned answers sheets on Google Class Room of Microprocessor in the assignment section

Q1. Write a program in assembly language of 8085 for finding 16 bit sum of only odd integers out of 370 8-bit integers stored at consecutive locations. Program should be well documented. 3 Marks

Q2. Write a well documented program assembly language of 8085 for 8X8 Multiplication by shifting multiplicand. 4 marks

Q3. Write a program in assembly language of 8085 to arrange 350 integers stored at consecutive memory locations starting with address 2200H in descending order. Program should be well documented. 4 Marks

Q4. Write syntax and then explain the following instructions

LDAX, LHLD, STAX, SHLD 2 Marks

Q5. Draw the Functional Block Diagram of 8085 and also explain the importance of temporary registers. 2 Marks
