20BCS021

First Minor Examination 2022

B.Tech. Computer Engineering V semester

Microprocessor CEN-503

Marks:-*15* Time:-One Hour

Attempt all questions honestly. Marks are written in the margin. You should not share your answers with anyone by any means. If it is found that sharing and copying have been done, then all involved in this will be awarded zero marks.

Q1. Write a program in assembly language of 8085 for finding 16 bit decimal sum of only non negative integers out of 356 8-bit decimal integers stored at consecutive locations. Program should be welldocumented. 3 Marks

Q2. Write a well documented program assembly language of 8085 for 8X8 Multiplication by without shifting multiplicand using subroutine. 4 marks

Q3. Write a program in assembly language of 8085 to arrange 360 integers stored at consecutive memory locations starting with address 2300H in descending order. Program should be well documented. 4 Marks

Q4. Write a program in assembly language of 8085 to generate Modulo-8 counter with a delay of 60 ms between each count assuming a system with 0.5 microsecond clock period. Show all calculations. 4 Marks
