B.Tech.(Computer Engg.) V Semester Examinations

Session 2021-22

Time: 1 hour Object Oriented Programming (CEN - 504) Retest Max. Marks: 15

Note: Attempt All Questions

S. No.	Questions	Marks	Course Outcome
1.	In a bank, different customers have saving account. Some customers may have taken a loan from the bank. So bank always maintains information about bank depositors and borrowers. Design a base class *Customer* (name, phone-number). Derive a class Depositor (accno, balance) from Customer. Again derive a class Borrower (loan-no, loan-amt) from Depositor. Write necessary member functions to read and display the details of 'n' customers. Implement relevant constructors also.	4	CO1
2.	Explain briefly with the help of suitable code: ➢ Inline functions ➢ Copy constructor ➢ Dynamic constructor	4	CO3
3.	Write an interactive program in C++ using self-referential classes. The program should support insertion at end and deletion in the beginning on a single link list.	4	CO1
4.	Differentiate between method overriding and method overloading with the help of suitable program in C++.	3	CO1
